

RENEWABLE ENERGY

RiskSmith's **Renewable Energy Program** is designed to provide capacity to renewable energy property, as well as projects in the course of construction.

ADVANTAGES

- **Solar-Farms and Wind-Turbine projects / programs** are often underinsured against moderate to severe CAT events such as Named Windstorm and Hail.
- **RiskSmith uses in-house capacity and unique facultative reinsurance agreements** to provide additional capacity in High-hazard severe convective storm and Named Windstorm areas to complement/extend typical all-risk programs.

COVERAGE FEATURES

- **Targeted Accounts:** Solar-Farms and/or Wind-Turbine schedules located within the United States
- **Account TIV (Total Insured Value):** Typically between \$100M and \$5B
- **Limits Available / Project Appetite:** Up to \$10,000,000 in buffer and excess all-risk or DIC layers over an all-risk primary or CAT peril sublimit

UNDERWRITING

The RiskSmith Renewable Energy program provides flexible capacity for this complex class of business.
